

Speech & Occupational Therapy Initiative

In keeping with our focus of developing strong foundations in our early childhood years, Carine PS will provide speech and occupational therapy screening to Kindy students to identify at risk students needing extra intervention to further their development.

Ongoing speech therapy will be held in small group classes on a weekly basis whilst the students are in Kindy and Pre-Primary. As a parent/guardian, you will receive information about your child's results and progress pertaining to this.

For your child to be screened and if needs be, included in the Speech Therapy program, we ask that you please complete the Parent Permission slip below. Questionnaires may also be forthcoming regarding these programs at the beginning of the school year.

We look forward to your support in this initiative for the benefit of your child's development.

Permission Slip

I give permission for my child _____

to be included in the Speech and Occupational Therapy screening process and understand I will be advised if my child will be included in the speech therapy small group class at school.
